Status of past & present interventions	<p>Status of past intervention:</p> <p>Dacope is the southern costal area of Bangladesh. This place is adjacent with the mangrove forest Sundarbans. The area's ecological biodiversity and geographical landscape is different from the main land of Bangladesh. The area has many rivers which are connected with the sea. So this is the area of brackish water. The tidal rivers created this area as a place of brackish water which is a mixture of fresh river water and saline sea water. A Lot of water resources like fishes of different species are available in these rivers. Sundarban itself is a large source of various resources like wood, honey, Nipapam tree etc. So the pattern of livelihood, economy, transportation and daily life of people who are living here is also different. The major problem people of this region are facing is increase in salinity, lack of drinking water, river erosion, increasing trend of flood and cyclone, extreme & extended shrimp farming. Agriculture and fishing are the main professions of people of this region. However, for the past few years people are facing serious problem both in agriculture and in fishing. social Problem is Early marriage Rate 55% woman are not going to house. gender equity is low. education quality is low beside Drop out rate high another thing child labor is present, cyclone .River erosion salinity is incised day by day. Poor people are migration in city government is providing support to a small number of vulnerable people through its safety net programs. These include 100 days employment</p>

guarantee program, vulnerable group feeding (VGF), vulnerable group development (VGD), money for work (Kabita), food for work (Kabikha), elderly allowance, widower allowance, freedom fighter allowance, and disability allowance. However, all these are distributed through union parishad and are not equally allocated as claimed by the local people. Under education program government has established a number of primary schools here but secondary and college education facility is inadequate. Under the same programs, some school going girls are getting stipends. Social Welfare an Agriculture, Women and children Affairs, Bangladesh Rural Development Board (BRDB), Health & Family Planning, Local Government Engineering and Livestock & Poultry departments have some programs but the general people have little access and information regarding such program.

Status of present intervention: jebv³ GKdmjx Rwg†K †`vdmjx Rwg†Z æcvšÍwiZ n†q†Q
