

## \*\*Our Reach

**CJG:** With the thought of achieving greater productivity and efficiency among our Community Journalist Group members through motivating children to take part in child journalism; enhancing their news collection skill, writing skill, prioritizing the issues for news; increasing their capacity to be linked with possible scopes of child publication and guiding respective staff on motivating and monitoring children for preparing publication, we are trying to take different capacity building initiatives on child journalism for the children of our LRPs.

**Child Forum:** A platform where children feel courageously empowered. It is an opportunity that inspires children to think outside of their box and create something new. Child forums are a platform that gives children encouragement, motivation, unity, and strengthens their voices as they learn how to work hand-in-hand with their communities. To enhance the development and growth of children, children groups have been formed at the LRP level to bring more children together, known as Child Forum. In addition to forming children's forums, various training and guidelines are being provided to empower and organize children through which children participate in making their own decisions about how to move their future-forward.
